Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Foraker (US 6,575,328). Foraker teaches an insulating pad 11 consisting of a foam rubber layer 12 and a magnetic layer 13 (column 2, lines 64-67, figures 1 and 2). Foraker teaches the foam rubber layer bonded to the magnetic layer by an adhesive layer (column 3, lines 21-23). Figure 3 of Foraker shows that the magnetic and the foam rubber layer are coextensive in area. The foam rubber layer is a rubberized plastic of foamed neoprene rubber (column 3, line 4). It is the examiner's position that Foraker anticipates the claimed subject matter.

Response to Arguments

3. Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.
4. The art rejections in the Office Action mailed on 02/11/2003 have been overcome by the present amendment and response.

Conclusion
